

Cloud Computing Lab

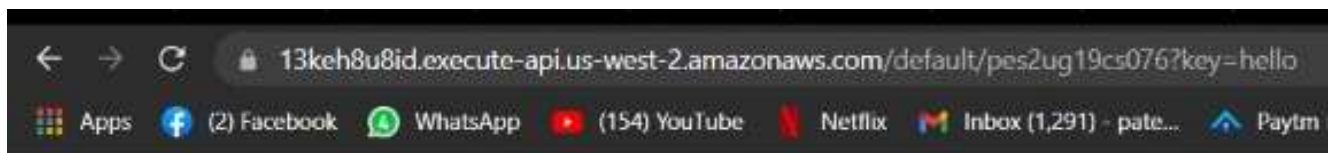

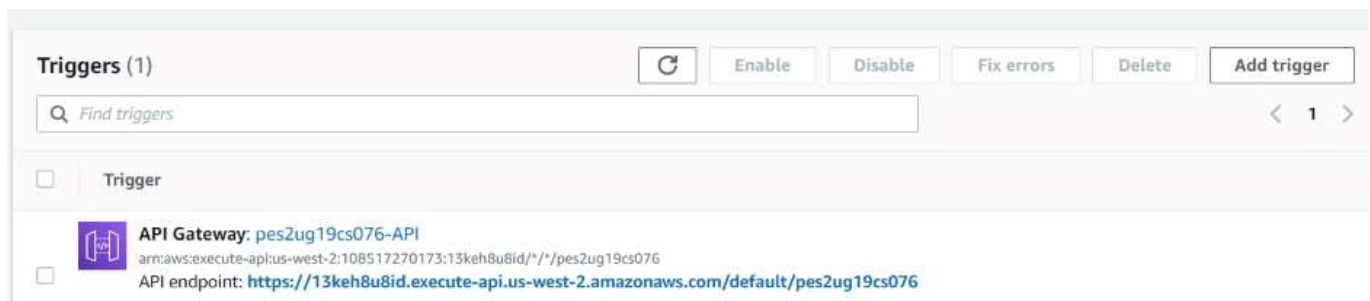

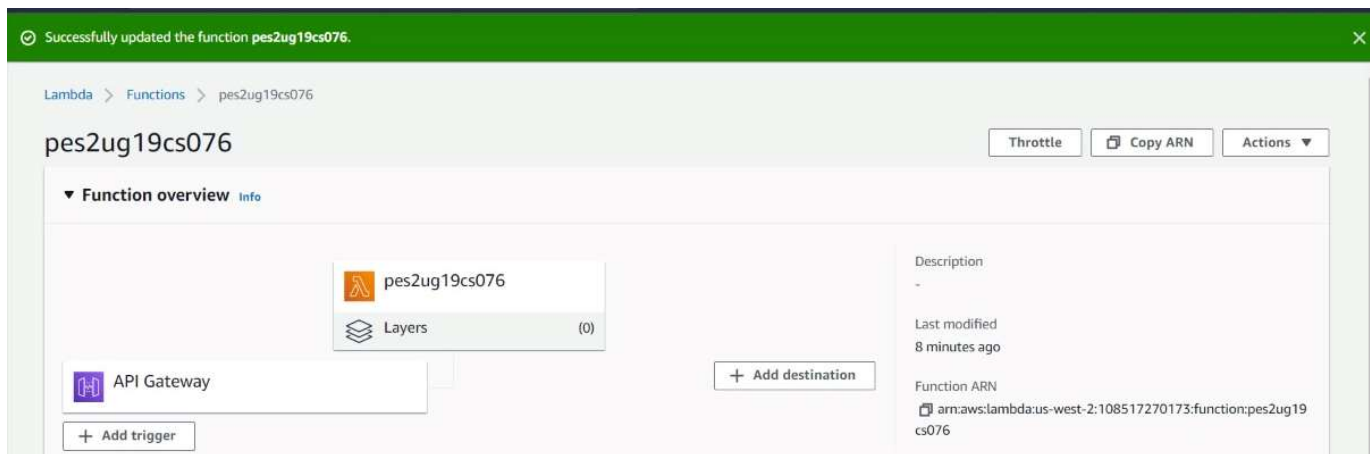

Week 2

Name – B Pravena

Section – B

SRN – PES2UG19CS076

Task 2 - Introduction to REST APIs with AWS Lambda and API Gateway

"pes2ug19cs076 : hello"

```
lambda_function x
1 import json
2
3 def lambda_handler(event, context):
4     if event['requestContext']['http']['method'] == "GET":
5         # TODO implement
6         x,v=event['rawQueryString'].split('=')
7
8         return {
9             'statusCode': 200,
10            'body': json.dumps(f'pes2ug19cs076 : {v}')
11        }
12    else:
13        return {
14            'statusCode': 200,
15            'body': json.dumps('Only GET is supported')
16        }
17
```
